Snake Scare at Kakatiya University Hostel

- Snakes, scorpions and rats creating panic among students
- 14 PG students bitten by rats last month
- Snake sighted recently in Pharmacy Hostel
- Earlier snake found in Girls' Hostel D-Block

Warangal : The Kakatiya University, which holds a special place in Telangana after Osmania University, is now facing a serious menace from snakes, scorpions and rats. Students allege that due to lack of basic hygiene, snakes are even entering hostel buildings, while rats have intruded into hostel rooms and inflicted injuries on several students.

About a month ago, 14 PG students were bitten by rats in the Girls' Hostel of Kakatiya University, causing a major concern. They were given medical treatment and later sent home.

Recently, a snake was spotted in the Pharmacy Hostel, triggering panic among students. The snake was seen moving around the hostel premises and climbing the stairs, and students immediately informed the university authorities.

Earlier, about 15 days ago, a snake was also found in the bathroom door of the Girls' Hostel (D-Block), which created fear among girl students.

In view of the repeated incidents, university staff have advised students to remain vigilant, move carefully during night hours, keep the hostel premises clean, avoid food waste, and immediately inform the staff if a snake is sighted.

> *"Students and their parents are demanding immediate and effective measures to curb the snake menace and ensure a safe and hygienic hostel environment.*

Written Test for Station Master Posts

Good news for job seekers waiting for railway opportunities. The Railway Recruitment Boards (RRBs) conduct a multi-stage selection process for the recruitment of Station Master posts. Candidates have to qualify in a Computer Based Test (CBT) first, followed by a Computer Based Aptitude Test (CBAT), and then document verification and medical examination for final selection.

Three-Stage Selection Process

The selection for Station Master posts will be done in three stages:

- **Stage 1 :** Computer Based Test (CBT)
- **Stage 2 :** Computer Based Aptitude Test (CBAT)
- **Stage 3 :** Document Verification and Medical Examination

Only candidates who qualify in the first stage (CBT) will be allowed to appear for the CBAT. Candidates who clear all the stages will be considered for final selection as per the rules.

K-Hub Turns into a White Elephant:. Multi-Crore Building Lies Unused

- No major activities even after 3 years
- Around ₹15 crore spent under RUSA funds
- Students question the utility and purpose of K-Hub

Warangal : The K-Hub building constructed at Kakatiya University with a cost of several crores has reportedly turned into a white elephant. It was inaugurated with much fanfare three years ago by three ministers, but since then, there has been no significant activity, students allege. They claim that the then Vice-Chancellor and Registrar spent crores of rupees in the name of K-Hub, benefiting contractors and officials, but it has not served the intended purpose for students.

The K-Hub was established with the objectives of enhancing students' skills, nurturing young entrepreneurs, promoting start-ups, and linking them to employment opportunities. However, even after three years, the expected activities have not started in full swing, raising serious questions within university circles.

Officials had earlier stated that the K-Hub was set up at a cost of around ₹15 crore under the RUSA (Rashtriya Uchchatar Shiksha Abhiyan) funds during the tenure of former Vice-Chancellor Prof. Thatikonda Ramesh.

Now, students are questioning whether the objectives of the RUSA funds are being achieved, and to what extent this multi-crore facility is actually benefiting the students. The university administration is urged to provide clear answers and make the K-Hub functional at the earliest.
